

## FIT5148 DIST DATABASES AND BIG DATA Assignment 2 Individual Feedback

Student Name: XITONG JIANG  
 Marker Name: Prajwol

Tasks	Criteria	Result	Comments
A1	Correctness of the query	Work Perfectly	No Comments
A2	Correctness of the query	Work Perfectly	No Comments
A3	Correctness of the query	Work Perfectly	No Comments
A4	Correctness of the query	Work Perfectly	No Comments
A5	Correctness of the query	Work Perfectly	No Comments
A6	Correctness of the query	Work Perfectly	No Comments
A7	Correctness of the query	Work Perfectly	No Comments
A8	Correctness of the query	Work Perfectly	No Comments
	Correctness of the data model design	Follows Embedded or Referencing	No Comments
B1	Justification of the chosen data model design	Not Good/Not Attempted	Incorrect Justification.
B3	Implementation of Python Application	Works Perfectly	Poor code design.
	Rewriting the queries A2-A8	Works Perfectly	Unwind is not necessary for A7 and A8 for embedding model.
B4	Parallel Implementation of a Query	Work Perfectly	No Comments
C1	Implementation of Python Application	Works Perfectly	Each climate data has only 4 fire data inserted in final insertion.

C2	Implementation of Spark Streaming Application	Works Perfectly	Local streaming context with 2 threads and batch interval of 5 seconds has not been satisfied.
Interview	Understanding of the assignment submitted	Complete Understanding	No Comments
Google Drive	Contribution towards collaborative tool	Appropriate or Some Contribution	No Comments
% Contribution	Overall contribution towards assignment	50	No Comments
Grade:			HD
